

Shell_Scripting_MCQs

Question	Option A	Option B	Option C	Option D	
Which of the following is a valid Bash 'for' loop?	foreach i (1..5) echo \$i	for i = 1 to 5: echo \$i	for(i=1;i<=5;i++) echo \$i	for i in {1..5}; do echo \$i; done	
Which of the following is a valid Bash 'for' loop?	for(i=1;i<=5;i++) echo \$i	for i = 1 to 5: echo \$i	for i in {1..5}; do echo \$i; done	foreach i (1..5) echo \$i	
How do you assign a value to a variable in Bash?	set var = value	var=value	var = value	define var value	
What does 'cp file.txt file.txt.bak' do?	Renames file.txt	Moves file.txt	Deletes file.txt	Creates a backup copy of file.txt	
What does 'chmod +x script.sh' do?	Deletes the script	Executes the script	Makes the script executable	Changes script name	
What does 'chmod +x script.sh' do?	Makes the script executable	Changes script name	Executes the script	Deletes the script	
What does \$1 represent in a shell script?	The first argument passed to the script	The number of arguments	The name of the script	The exit status	
What does 'cp file.txt file.txt.bak' do?	Creates a backup copy of file.txt	Renames file.txt	Moves file.txt	Deletes file.txt	
Which command checks if a file exists?	if -f \$file	if exist \$file	[-f \$file]	test exist \$file	
Which command is used to copy a file in Linux?	cpy	copy	cp	mv	
What is the purpose of checking '\$UID' in a script?	To check script path	To count users	To get current user name	To see if the user is root	
What is the purpose of checking '\$UID' in a script?	To get current user name	To see if the user is root	To count users	To check script path	
Which command is used to copy a file in Linux?	cpy	copy	mv	cp	
Which of the following is a valid Bash 'for' loop?	for i in {1..5}; do echo \$i; done	for i = 1 to 5: echo \$i	for(i=1;i<=5;i++) echo \$i	foreach i (1..5) echo \$i	
Which command is used to make a shell script executable?	run script.sh	bash +x script.sh	execute script.sh	chmod +x script.sh	
Which command is used to make a shell script executable?	run script.sh	bash +x script.sh	chmod +x script.sh	execute script.sh	
Which of the following is a valid Bash 'for' loop?	foreach i (1..5) echo \$i	for i in {1..5}; do echo \$i; done	for i = 1 to 5: echo \$i	for(i=1;i<=5;i++) echo \$i	
Which command is used to make a shell script executable?	chmod +x script.sh	run script.sh	execute script.sh	bash +x script.sh	
What does \$1 represent in a shell script?	The first argument passed to the script	The number of arguments	The name of the script	The exit status	
What does \$1 represent in a shell script?	The first argument passed to the script	The exit status	The name of the script	The number of arguments	
What does 'cp file.txt file.txt.bak' do?	Creates a backup copy of file.txt	Renames file.txt	Moves file.txt	Deletes file.txt	
What does 'chmod +x script.sh' do?	Changes script name	Makes the script executable	Executes the script	Deletes the script	
What does \$1 represent in a shell script?	The first argument passed to the script	The number of arguments	The exit status	The name of the script	
Which command checks if a file exists?	test exist \$file	[-f \$file]	if exist \$file	if -f \$file	
What does 'cp file.txt file.txt.bak' do?	Renames file.txt	Creates a backup copy of file.txt	Deletes file.txt	Moves file.txt	
What does 'chmod +x script.sh' do?	Changes script name	Deletes the script	Makes the script executable	Executes the script	
Which of the following is a valid Bash 'for' loop?	foreach i (1..5) echo \$i	for(i=1;i<=5;i++) echo \$i	for i = 1 to 5: echo \$i	for i in {1..5}; do echo \$i; done	
Which of the following is a valid Bash 'for' loop?	for i = 1 to 5: echo \$i	for i in {1..5}; do echo \$i; done	foreach i (1..5) echo \$i	for(i=1;i<=5;i++) echo \$i	
Which command checks if a file exists?	if -f \$file	test exist \$file	[-f \$file]	if exist \$file	
Which command is used to copy a file in Linux?	cpy	cp	copy	mv	
What does 'cp file.txt file.txt.bak' do?	Moves file.txt	Renames file.txt	Creates a backup copy of file.txt	Deletes file.txt	
Which command checks if a file exists?	[-f \$file]	if -f \$file	test exist \$file	if exist \$file	
What does \$1 represent in a shell script?	The name of the script	The first argument passed to the script	The exit status	The number of arguments	
Which command shows disk usage in Linux?	diskstat	free	du	df	
How do you assign a value to a variable in Bash?	define var value	set var = value	var = value	var=value	
Which command is used to make a shell script executable?	execute script.sh	chmod +x script.sh	bash +x script.sh	run script.sh	
Which command is used to make a shell script executable?	chmod +x script.sh	bash +x script.sh	run script.sh	execute script.sh	
Which command is used to make a shell script executable?	bash +x script.sh	execute script.sh	run script.sh	chmod +x script.sh	
What is the purpose of checking '\$UID' in a script?	To check script path	To see if the user is root	To count users	To get current user name	
What is the purpose of checking '\$UID' in a script?	To see if the user is root	To get current user name	To check script path	To count users	
Which of the following is a valid Bash 'for' loop?	foreach i (1..5) echo \$i	for i = 1 to 5: echo \$i	for(i=1;i<=5;i++) echo \$i	for i in {1..5}; do echo \$i; done	
What does 'cp file.txt file.txt.bak' do?	Deletes file.txt	Moves file.txt	Renames file.txt	Creates a backup copy of file.txt	
What does \$1 represent in a shell script?	The first argument passed to the script	The exit status	The number of arguments	The name of the script	
Which of the following is a valid Bash 'for' loop?	for i in {1..5}; do echo \$i; done	for(i=1;i<=5;i++) echo \$i	for i = 1 to 5: echo \$i	foreach i (1..5) echo \$i	
What does 'chmod +x script.sh' do?	Deletes the script	Executes the script	Makes the script executable	Changes script name	
How do you assign a value to a variable in Bash?	set var = value	var=value	define var value	var = value	
What is the purpose of checking '\$UID' in a script?	To count users	To check script path	To get current user name	To see if the user is root	
Which command shows disk usage in Linux?	df	free	du	diskstat	
What does \$1 represent in a shell script?	The number of arguments	The first argument passed to the script	The exit status	The name of the script	
Which command shows disk usage in Linux?	free	diskstat	du	df
